

Low Sulphur Fuel Surcharge Update for Q2. 2026

Dear valued customers,

Thank you very much for always using our services.

Due to the recent rise in international oil prices, fuel costs for ship operations continue to increase, so we inevitably adjust and apply the Low Sulphur Surcharge (LSS) rate as follows.

Please understand that this adjustment reflects the International Maritime Organization's (IMO) obligation to use low-sulfur oil under IMO2020 environmental regulations and changes in fuel costs linked thereto, and is an inevitable adjustment considering market conditions.

Please note that low-sulfur oil surcharges are regularly adjusted in conjunction with oil prices for each section to cope with oil price volatility, and may change depending on market conditions in the future.
