

Low Sulphur Fuel Surcharge Update for Q3. 2026

Dear valued customers,

Thank you for your continued trust in our services.

Due to the recent rise in international oil prices, the fuel costs associated with vessel operations have continued to increase. As a result, we regret to inform you that we will be adjusting the Low Sulphur Fuel Surcharge (LSF) rate as set out below.

This adjustment reflects the obligation to use low-sulphur fuel under the International Maritime Organization's (IMO) IMO 2020 environmental regulations, as well as the related fluctuations in fuel costs. We kindly ask for your understanding that this is an unavoidable measure in light of current market conditions.
